Microfinance Loan Management System(LMS)

Overview:

A web-based microfinance software designed to manage the complete loan lifecycle for small finance institutions from member registration to loan settlement. It streamlines operations like member onboarding, loan approval, EMI collection, and branch management.

Key Workflow:

- ✓ **Member Registration:** New members are registered into the system.
- ✓ **Collector Registration:** Collectors are added and managed by the admin.
- ✓ **Collector-Member Assignment:** Collectors are assigned to specific members.
- ✓ **Branch Creation:** Branches are created and managed by the owner.
- ✓ **Loan Request:** Members submit loan requisition requests.
- ✓ **Loan Approval:** Admin reviews and approves loan applications.
- ✓ **Loan Disbursement:** Approved loans are disbursed to members.
- ✓ **EMI Collection:** Collectors collect EMIs from members and update the system.
- ✓ **Loan Settlement:** Members can settle their loans before or after term completion.

Roles & Responsibilities:

- ✓ Built and maintained modules using **ASP.NET MVC**, **C#**, and **SQL Server**.
- ✓ Developed features for loan requests, approval, disbursement, and settlement.
- ✓ Created and validated forms for member and collector registration.
- ✓ Designed database tables for members, loans, EMIs, and branches.
- ✓ Implemented logic for EMI tracking and loan settlement options.
- ✓ Worked closely with the team to fix bugs and enhance performance.
- ✓ Participated in testing and deployment of new features.
